Customer Testimonials

"After the crash I was in complete disbelief. The other motorist vehicle was totaled and my vehicle was in perfect condition. This was the last thing I thought about when I bought my bumper from T.A.G. but with two children in the back seat at the time of the crash, this purchase proved to be more valuable than I ever could have Imagined."

At Tactical Armor Group this is actually the most common and rewarding feedback we receive from our customers. Our customers are often so excited by our product after an incident like this that it is not uncommon for them to come back to our doorstep; Showing off the lack of damage on their rig with pride, often accompanied by photos and a comment like, "you should see the other guy!"

Theses photos were taken after the jeep with a TAG bumper was rear ended by the SUV above.
